Career Objective

Passionate Frontend Developer with 1 year+ of experience building scalable, responsive web applications using React.js, Next.js, Redux, and REST APIs. Experienced in e-commerce, SaaS platforms, and dashboard development. Seeking to contribute to a growth-driven engineering team.

Skills

Frontend: HTML5, CSS3, JavaScript (ES6+), React.js, Next.js, Redux, TypeScript

UI & Styling: Tailwind CSS, shadcn, Material UI

Backend: Node.js, Express.js, REST APIs, JWT Authentication

Database: MongoDB

Tools: VS Code, Netlify, Vercel, Git & GitHub, Figma, Firebase

Payment: SSL commerce, Stripe

Other: Basic SEO (On-page SEO, Meta Tags, Sitemap/Robots handling)

Work Experience

Frontend Developer - Tach Element IT, Motijheel, Dhaka

May 2025 - Present

- Identified and resolved production-level bugs across live e-commerce and SaaS applications.
- Improved checkout flow stability by fixing payment integration, shipping address, and shipping method issues.
- Implemented conditional offer logic and resolved admin configuration bugs.
- Applied SEO best practices (dynamic meta tags, Open Graph, structured data).
- Developed and maintained scalable user, admin, and role-based dashboards using React.js and Next.js.
- Integrated REST APIs and optimized frontend performance for production systems.
- Collaborated with cross-functional teams to deliver production-ready features.

Web Developer - RAF Holding

June 2024 – March 2025

- Developed responsive and interactive UI components
- Intergrated REST APIs and optimized frontend performance for fast and accessible web applications dashboards
- Collaborated with UI/UX designers, backend developers and frontend team members to deliver a seamless user experience

Projects:

KRY International – (E-commerce Production) – [Live-Side](#)

- key Features:

- Technologies:** Next.js (app router), TypeScript, Redux-toolkit, RTK Query, Shadcn, TailwindCSS.
- Developed and maintained user & admin dashboards using React.js and Next.js.
- Sign up with ease using username, email, and password. Optionally, personalize user profile.
- Dive into detailed product descriptions, images, pricing, and customer reviews.
- Efficiently find desired items using search functionality and apply filters based on size, color, and more.

Account Management System (SaaS Multi-Vendor) – [Live-Side](#)

- key Features:

- Technologies:** React.js (app router), TypeScript, Redux-toolkit, RTK Query, Material UI, TailwindCSS.
- Developed financial and operational dashboards for a SaaS-based multi-vendor system.
- Built and maintained modules including (Balance tracking & ledger system, Voucher, Account transactions, User management & role-based access control, CMS management system).
- Implemented real-time financial data updates with optimized API handling.
- Debugged and improved transactional logic to enhance **financial accuracy** and reduce discrepancies.
- Integrated **audit trails** and **activity logs** for secure tracking of financial and administrative actions.
- Implemented **reporting & analytics dashboards** for quick insights into vendor performance and revenue streams.
- Collaborated with backend team to integrate REST APIs for real-time data operations.

School Management System – [Live-Side](#)

- key Features:

- **Technologies:** Next.js (app router), TypeScript, Redux-toolkit, RTK Query, Material UI, TailwindCSS.
- Led frontend development **end-to-end** for a multi-tenant SaaS school management platform.
- Built role-based dashboards for Admin, Teacher, and Student.
- Developed modules including (Student attendance tracking system, payment & fee management).
- Collaborated with backend team to integrate REST APIs for real-time data operations.

Gadget Shop – (MERN Stack | E-commerce website) – [Live-Side](#)

- key Features:

- **Technologies:** React.js (app router), RESTful APIs, JWT Token, Stripe, MongoDB, Express.js, Tan Stack Query, Sweet Alert.
- Admins have access to detailed statistics, enabling them to analyze user engagement and product items.
- Secure user authentication and authorization using JWT tokens, ensuring a safe and reliable experience.
- Payment integration with Stripe, allowing seamless transactions for premium features or memberships.
- Make Backend and Frontend integrate REST APIs for real-time data operations.
